Technological University Dublin

Founder of Irish Language Society

- Established and grew membership to 50+, securing interpreters for inclusivity
- Promoted Irish culture and inclusivity through Irish and UK Sign Language.

Dublin, Ireland

Dec 2024 - Present

Projects

Greenhouse Monitoring System (2nd Year):

Designed a real-time system to track temperature, humidity, and light (DS1820, DHT22, LDR) with LCD and PCB layout optimization. Tested for sensor accuracy and system performance.

Networked Microcontroller IoT System (3rd Year Mini Project):

Built an ESP8266-based microcontroller with Tasmota firmware for I²C/SPI communication. Integrated with Microsoft Azure, Node-RED, Grafana, and InfluxDB for cloud data management and real-time monitoring.

GP Virtual Monitoring System (3rd Year Final Year Project):

Developed a health monitoring platform tracking temperature, blood pressure, and heart rate. Used DS18B20 and SEN0203 sensors with MQTT/Azure integration and MySQL (XAMPP) for secure storage. Designed a dynamic website (HTML, CSS, JavaScript, PHP) for real-time health data access.

ADDITIONAL INFORMATION

Skills: Leadership(Captain), Problem Solving(Sales), Proficient in Arabic & Sign language

Computer: Proficient in Excel, PowerPoint, Beginner Python, C, and C++.
